DETAILED ACTION

1. This office action is in response to the amendment filed on 1/03/08.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mike Whitham on 3/27/08 in order to overcome potential 35 USC 101 issues and put the claims in condition for allowance.

Claims 11, 15, 18 and 23 have been amended; Claim 14 has been cancelled.

Claim 11 has been amended as follows:

11. A system for collaborative Web browsing, comprising:

means for associating collaboration spaces with one or more Web documents, topics and meta data;

means for defining collaboration spaces which comprise collaboration members and discussion chains;

a display device for displaying a graphical user interface;

a collaboration toolbar component which generates a collaboration toolbar display on ~~a user interface (UI)~~ the graphical user interface, the collaboration toolbar including a user logon/logoff toggle button, buttons to manage and configure the collaboration spaces, a list box of related collaboration spaces, and a list box of related links;

a collaboration co-browser component which generates a collaboration co-browser display on ~~a user interface (UI)~~ the graphical user interface when a user logons on;

a monitor that observes a user's browsing activity, the collaboration co-browser component responding to the monitor and displaying collaboration elements of an appropriate collaboration space; and

a mining component to mine the ~~monitored browser~~ browsed content, URL (Universal Resource Locator), and meta data to determine related collaboration spaces.

Claim 14 is cancelled.

Claim 15 is amended as follows:

15. The system of claim 44 11, wherein upon mining the browsed content by the mining component, the monitored browsing activity populates the collaboration toolbar component with appropriately related collaboration elements.

Claim 18 is amended as follows:

18. The method of claim 4 6, wherein collaboration operations include sending email, instant messaging, creating new discussion threads, and posting and responding to discussions.

Claim 23 is amended as follows:

23. A system for collaborative Web browsing, comprising;

an augmented browser comprising an Internet browser, a collaboration toolbar, a collaboration explorer bar, a monitor, and a classifier provided with a miner plug-in, the Internet browser populates with Web sites and notifies the monitor when new documents arrive, the monitor, in turn, attempts to classify the newly loaded content using the classifier, the classifier uses the content, URL (Universal Resource Locator) or meta data associated with the loaded page and passes this information to the miner plug-in in order to identify content to determine page, topic or meta data content, the monitor then attempts to discover related collaboration spaces (CollabSpaces), URL links, and role players that might be helpful to the loaded content in the Internet browser, once the monitor has completed classifying the content and collecting the related collaboration context, the monitor instructs the toolbar and the explorer bar to populate with corresponding collaborative elements that are related to a current browsing context; and

a collaboration server component that maintains collaborative content and allows for the collaborative Web browser to interact with the collaboration content, the collaboration server component including a view generator used to assemble together collaboration elements that are part of a collaboration context and a context manager communicating with the collaboration toolbar, monitor and view generator and which maintains relationships between collaboration elements and provides a mechanism to inference relationships between collaboration elements and elements infer relationships between collaboration elements.

REASONS FOR ALLOWANCE

3. Claims 1, 3, 5-7, 11, 15-19, and 21-32 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach and/or suggest the subject matter of these claims. Independent claims 1, 11 and 23, when considered as a whole, are allowable over the prior art of record. Specifically prior art of record fails to clearly teach a mining component for mining browsed content, URL (Universal Resource Locator) and meta data to determine related collaboration spaces which comprise collaboration members and discussion chains and a collaboration toolbar for managing the collaboration spaces and listing related collaboration spaces.

Dependent claims 3, 5-7, 15-19, 21-22 and 24-32 further add limitations to the allowable subject matter of the respective independent claims, thus are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
